- Developed workflows for packaging and deploying Serverless applications within CapitalOne's ecosystem.
- Triaged security compliance issues.
- Maintained legacy hotel arbitrage monolith service, added extensive testing, and prepared for switchover to next-generation replacement.
- Architected next-gen event-sourced/CQRS system for hotel arbitrage.
- Implemented entity-resolution microservice for matching hotel names and addresses against Priceline's dataset.
- On-call for service outages and incidents.

**Developer**, Discogs, 2015-2018

- Refactored and extended test coverage on a large legacy Python 2.7 codebase.
- Prepared the legacy codebase for a potential Python 3 upgrade.

- Developed new features to support the buyer and seller experience, including an improved record collection feature and shipping labels.
- Created and deployed containerized applications to Discogs' Kubernetes cluster.
- On-call for Discogs' central authentication service.
- Instrumented new and existing systems and API integrations.
